

GrantGlobe Source List — Codebook

Dataset: source_list_v0.5_combined.csv **Version:** 0.5 **Entries:** 550 **Authors:** Jess (schema design, definitions, controlled vocabulary); Jessica (technical review — pending) **Last updated:** 2026-05-21

Purpose of this Codebook

This codebook defines every column in the source list dataset, documents all valid values, explains the rationale for each field, and provides guidance for future data entry. It is the reference document for anyone extending the list, building the LLM extraction pipeline (Layer 3), or reviewing data quality before the crawler (Layer 2) is deployed.

Column Definitions

id

Type: Integer (sequential)

Description: A unique numeric identifier for each row in the dataset. Assigned sequentially in order of entry across all passes. Not meaningful beyond uniqueness — do not use as a ranking or priority signal.

Valid values: Any positive integer. No duplicates permitted.

Current range: 1–550

Data entry note: When adding new rows, continue the sequence from the current maximum. Do not re-use IDs from deleted entries.

org_name

Type: String (free text) **Description:** The full official name of the organization, fund, program, or institution. Where the organization is commonly known by an acronym, the format is ACRONYM - Full Name (e.g., UNDP - UN Development Programme). Where there is no common acronym, the full name is used as-is.

Valid values: Free text. No controlled vocabulary. **Conventions:**

- Acronym-first format: ACRONYM - Full Name for institutions with widely used acronyms
- Name-first format: Full Name for institutions without a standard acronym
- Include country or institutional parent in parentheses only when disambiguation is needed (e.g., two organizations with the same name in different countries)
- Do not truncate or abbreviate

Examples:

- UNDP - UN Development Programme
- Safaricom Foundation

- FAPESP - São Paulo State Research Foundation
-

domain

Type: String (root domain, no protocol, no path) **Description:** The root domain of the organization's primary website. Used as the base URL for the crawler. Does not include https://, www., or any path.

Valid values: Valid root domain format (e.g., undp.org, giz.de, cnpq.br) **Conventions:**

- No protocol prefix (https:// or http://)
- No www. prefix
- No trailing slash
- No subdomain unless the grant program lives on a distinct subdomain with no parent domain grant page (e.g., aiforgood.itu.int where itu.int is a separate entry)
- Use the primary organizational domain, not a country-office subdomain

Examples:

- undp.org ✓
- https://undp.org ✗
- www.undp.org ✗
- undp.org/funding ✗

Data quality note: Some entries (particularly from pass 4/5 additions) have best-guess domains that have not yet been verified. Stage 3 verification will confirm or correct these.

grants_url

Type: String (full URL) **Description:** The most specific known URL for the organization's grants, fellowships, funding opportunities, or open calls page. This is the URL the crawler will visit first. Must be a full absolute URL including https://.

Valid values: Full HTTPS URL. Must begin with https:// or http://.

Conventions:

- Point to the most specific grants/funding page available, not the homepage
- Prefer a page that lists multiple programs over a single program page (unless only one program exists)
- Use the English-language version of the page where one exists
- If no dedicated grants page exists, use the homepage (https://domain.org/) as fallback
- Do not use redirect-heavy URLs (use the canonical destination URL where possible)

Examples:

- https://www.undp.org/funding ✓ (specific funding page)
- https://undp.org ✗ (homepage fallback only — acceptable if no grants page exists)
- http:// URLs are acceptable for sites that do not support HTTPS (flag these in notes)

Data quality note (critical):

URLs in this column are best-guess entries from knowledge at time of compilation. Many will be stale, broken, or redirected. @GrantGlobe is performing a systematic URL verification pass (Stage 3). Do not treat any URL in this column as verified until the verification flag column is added post-Stage 3.

Known URL patterns by institution type:

- UN agencies: typically [https://www.\[agency\].org/\[language\]/funding](https://www.[agency].org/[language]/funding) or similar
- National research councils: often [https://www.\[domain\]/convocatorias/](https://www.[domain]/convocatorias/) (Spanish) or [/en/calls/](https://www.[domain]/en/calls/) (English) or [/en/open-calls/](https://www.[domain]/en/open-calls/)
- Community foundations: varies widely; may use [/grants/](#), [/apply/](#), [/what-we-fund/](#)
- German political foundations (HBS, FES, FNF, KAS): note that each regional/country office has its own grant portal; the `grants_url` in the main entry points to the central page, but the crawler should also follow links to country office pages

category

Type: String (semi-controlled vocabulary)

Description: The institutional type and funding modality of the organization. Used for filtering, grouping, and display in the search interface. Not a strict controlled vocabulary — some entries use compound categories (e.g., Bilateral Aid / AI) where an institution operates across two types.

Primary category values (most common):

Value	Description
UN Agency	United Nations system agency (main body)
UN Agency - AI Specific	UN body with explicit AI focus (e.g., ITU AI for Good)
UN ESCAP / Regional	UN regional commission or sub-body
Regional Dev Bank	Multilateral development bank (ADB, AfDB, IDB, EBRD, etc.)
Regional Dev Bank - Innovation	Innovation/accelerator arm of a development bank
Bilateral Aid	Government bilateral development cooperation agency
Bilateral Aid / Research	Bilateral aid with explicit research funding mandate
Bilateral Aid / AI	Bilateral aid with explicit AI for development program
Bilateral Aid / Health	Bilateral aid with explicit global health research mandate
National Research Council	National government science and technology funding body
National Research Body	National government body with research funding (broader than council)
National Innovation Fund	Government innovation fund (broader than research)
Science Academy	National or regional academy of sciences with grant programs
Global Philanthropic	Large international philanthropic foundation

Value	Description
Regional Philanthropic	Philanthropic foundation with regional focus
Indian Philanthropic	India-based philanthropic foundation
Indian Academic / Philanthropic	India-based academic institution with philanthropic grant arm
Community Fund / Civil Society	Community foundation or civil society support fund
Community Fund / Women's Rights	Fund specifically targeting women's rights organizations
Women's Rights Fund	Dedicated women's rights and feminist grant-making body
Women's Rights Fund Network	Network of women's funds (members each have own calls)
Rapid Response Fund	Emergency or rapid-response grant mechanism
Corporate Foundation	Corporate philanthropic arm with active grant programs
Corporate Foundation / Research	Corporate foundation with explicit research grant focus
Corporate Foundation / AI	Corporate foundation with explicit AI research grant focus
Corporate Foundation / Tech	Corporate foundation with tech education/development focus
Tech Innovation Hub	Physical or virtual innovation hub with grant/fellowship programs
Innovation Hub Network	Network of innovation hubs (members each have own programs)
Pan-African Research Body	Pan-African scientific or social research institution
Pan-African Regional Body	Pan-African political/developmental regional institution
Pan-African / US-Funded	Africa-focused institution primarily funded by US government
Pan-African Research Network	Pan-African research network with grant programs
Pan-Latin American Research Body	Pan-Latin American scientific or social research institution
Pan-Americas Research Body	Americas-wide research network
CGIAR / International Research	CGIAR center or associated international agricultural research institute
EA-Adjacent	Effective altruism-adjacent grant-making body
AI Safety	AI safety-focused grant-making body
AI Safety - Research	AI safety research organization with grant programs
AI Governance	AI governance and policy-focused grant-making or fellowship body
AI Ethics	AI ethics research body with grant programs

Value	Description
AI Research	AI research institution with fellowship or grant programs
AI Research / Africa	AI research community or institution focused on Africa
AI Research / Global South	AI research body explicitly focused on Global South
AI Research / Gulf	AI research institution based in Gulf states
AI Research / South-South	AI research cooperation body (South-South focus)
Academic Fellowship	Fellowship or exchange program administered by an academic institution
Academic Research	Academic research institution with fellowship or grant programs
Academic Research / Gulf	Gulf-based academic institution with external research grants
Academic Network	Network of academic institutions with pooled grant programs
EU Research	European Union research funding program
Fast Grants	Low-bureaucracy individual grant mechanism
Fellowship	Standalone fellowship program
Research Network	International research network with grant or fellowship programs
NGO / Research	Large NGO with research partnership or grant program
Cultural Diplomacy / Research	Cultural diplomacy body with research fellowship components
Cultural Research	Cultural exchange and research grants
Policy Research	Policy research think-tank with fellowship or visiting scholar programs
Social Entrepreneurship	Social entrepreneurship fellowship or grant program
Innovation / Development	Innovation fund with developing-world focus
Innovation Fund	Innovation prize, challenge, or grant program
Innovation Program	Government-run innovation program with equity-free grants
Social Enterprise	Social enterprise incubator or accelerator with grants
Social Enterprise / Tech	Tech-focused social enterprise grant program
Residency Fellowship	Residential fellowship (not primarily cash grant)
Regional Research Body	Regional (sub-global) scientific or educational research institution
Regional Research Network	Regional research network with grant programs
Regional Body	Regional political or developmental body with potential grant windows

Value	Description
Regional Dev Fund	Regional development fund (sub-global, not a bank)
Islamic World Regional Body	OIC or related Islamic world science/culture body
Arab World Regional Body	Arab League or Arab-world science body
Arab Cultural / Research	Arab cultural and research grant-making body
South-South Cooperation	South-South cooperation fund or agency
Open Knowledge	Open data, open access, or knowledge commons grant body
Media / Research	Journalism or media research grant program
Media / Civil Society	Media freedom and civil society fund
Investigative Journalism	Investigative journalism grant and collaboration support
Diaspora Fund	Diaspora community development or research grant fund
Indigenous Rights Fund	Indigenous peoples' rights and cultural preservation grants
Biocultural Diversity Fund	Biocultural diversity and traditional knowledge grants
Language Preservation	Endangered language documentation and preservation grants
Anthropological Research	Anthropological and linguistic field research grants
Food Sovereignty Fund	Food sovereignty, agrobiodiversity, and small farmer grants
Organic Agriculture	Organic agriculture and agroecology research grants
Environmental Fund	Environmental research and conservation grants
Environmental Fund Network	Network of environmental funds (members have own calls)
Environmental Micro-grants	Small environmental grants for grassroots groups
Environmental Economics	Environmental economics research grants
Climate Fund	Climate research, adaptation, or advocacy grants
Disability Rights Fund	Disability rights and disability-inclusive development grants
Disability Rights / Research	Disability research and rights grants
Health Research	Health research grants (not primarily humanitarian)
Health / Development	Health and development combined mandate
Health Rights	Health rights advocacy and research grants
Sexual and Reproductive Rights	SRHR research and advocacy grants
Youth Fund	Youth leadership, innovation, and research grants
Civil Society Fund	General civil society support and defense fund
LGBTIQ+ Rights Fund	LGBTIQ+ rights research and advocacy grants

Value	Description
Governance Research	Governance, anti-corruption, and accountability research
Digital Rights Fund	Digital rights, internet freedom, and surveillance research grants
Digital Policy	Digital policy and internet governance body
Digital Access	Internet access and affordability research grants
Democracy	Democracy support and civil society grants
Energy Research	Energy and climate policy research grants
Cybersecurity / Policy	Cybersecurity policy research (note: also a source of opportunity listings, not always a grant-maker)
Faith-Based Development	Faith-based international development NGO with grant programs
Faith-Based Development / Research	Faith-based NGO with explicit research grant program
Micro-grant	Very small individual grants (typically under \$5,000)

Compound categories (use when an institution genuinely spans two types):

- Format: Primary / Secondary (e.g., Bilateral Aid / Research)
- Limit to two parts maximum
- Use sparingly; prefer the primary type if one dominates

region

Type: String (semi-controlled vocabulary) **Description:** The primary geographic scope of the funding opportunity — i.e., where eligible applicants can be based, or where funded work must take place. Not the location of the funder's headquarters (though these often coincide for national bodies).

Important distinction: region describes **eligibility geography**, not funder geography.

- USAID → Global - USAID Partners (US-headquartered but funds globally)
- NRF South Africa → South Africa (South Africa-headquartered and primarily funds South Africa-based researchers)
- IDRC Canada → Global - Research (Canada-headquartered but explicitly funds researchers globally)

Common values:

Value	Description
Global	No geographic restriction or explicitly worldwide
Global South	Explicitly restricted to or prioritizing developing/Global South countries
Global - [Agency] Partners	Worldwide but filtered by bilateral partnership agreements (e.g., Global - USAID Partners)
Developing World	Restricted to researchers in developing countries

Value	Description
	(often using UN/World Bank classification)
Africa	Pan-African (whole continent)
East Africa	East African subregion
West Africa	West African subregion
Southern Africa	Southern African subregion
Sub-Saharan Africa	Sub-Saharan Africa (excludes North Africa)
Africa & Asia	Dual-region scope
African Diaspora	African diaspora communities globally
Asia	Asia broadly
Asia-Pacific	Asia and Pacific combined
Southeast Asia	ASEAN-region countries
South Asia	SAARC-region countries
South Asia + Africa	Dual-region
South Asia + Southeast Asia	Dual subregional
East Asia	Northeast Asian countries
Central Asia + Iran + Turkey + Pakistan	ECO member states
Central & South Asia	Combined subregion
Indian Ocean Rim	Indian Ocean Rim Association member states
Pacific Islands	Pacific Island nations
Pacific Rim	Countries bordering the Pacific Ocean
Latin America	Latin American countries
Latin America & Caribbean	LatAm plus Caribbean
Latin America & Africa	Dual-region
Southern Latin America	MERCOSUR-region countries
Latin America + Spain/Portugal	Ibero-American (includes Iberian Peninsula)
Caribbean	Caribbean island nations
Middle East	Middle East broadly
Arab States	Arab League member states
OIC Member States	Organisation of Islamic Cooperation member states
OIC Countries / Dev World	OIC members that are developing countries
Gulf States	GCC countries (Saudi Arabia, UAE, Qatar, Kuwait, Bahrain, Oman)
Euro-Mediterranean	European and Mediterranean basin countries
EU + Associated Countries	EU member states and Horizon Europe associated countries
EU + Global	EU primary with global applicant eligibility

Value	Description
EU + Africa	EU-Africa bilateral
Europe & Central Asia	EBRD-region
UK / Global	UK-primary but some global programs
UK + Global	Joint UK and global eligibility
UK + Global South	UK-led but Global South-focused
[Country name]	Single-country scope (e.g., India, Brazil, Kenya)
[Country] / Global	Country-primary but international programs exist (e.g., China / Global)
[Country] (Region)	Country with sub-national specification (e.g., Brazil (São Paulo))
[Country] + [Country]	Bilateral (e.g., UK + Global South)
South Asia + Africa	Multi-regional
Muslim-majority Global South	Muslim-majority developing countries specifically
Turkic World	Turkic-speaking countries (SCO/Türk Akademisi scope)
CIS / Post-Soviet	Commonwealth of Independent States
BRICS+	BRICS member and partner states
Americas	North and South America combined
Black Sea Region	Countries surrounding the Black Sea
South Caucasus	Georgia, Armenia, Azerbaijan

individual_eligible

Type: String (controlled vocabulary — three values only)

Description: Whether an individual researcher, scholar, or applicant — without institutional affiliation or registered nonprofit status — can apply for funding directly from this organization.

This is the **core differentiator** of GrantGlobe relative to existing databases. Most grant databases do not capture this field at all.

Valid values:

Value	Meaning
yes	Confirmed: individuals without institutional affiliation can apply directly. Source reviewed and eligibility explicitly stated or reasonably inferred from program structure.
no	Confirmed: institutional affiliation, registered nonprofit status, or government sponsorship is required. Individuals cannot apply directly.

Value	Meaning
unknown	Not yet determined. Requires human review or LLM extraction pass to resolve. This is the majority state for new entries; it is not a negative signal — it simply means the field needs to be populated.

Critical notes:

- yes does not mean "easy to get" or "accessible" — it means the legal eligibility barrier does not exclude individuals
- A fiscal sponsor that accepts applications in lieu of nonprofit status counts as yes (note this in notes column)
- A fellowship program at a university that is technically open only to enrolled students should be no unless external researchers can also apply
- If a program has both individual-eligible and institutional tracks, use yes and explain in notes
- Do not guess: if uncertain, use unknown rather than yes or no

Population status (v0.5):

- yes: 382 entries (69%)
- unknown: 147 entries (27%)
- no: 21 entries (4%)

Target: Resolve all unknown entries to yes or no during Stage 3 verification and the LLM extraction pipeline pass.

notes

Type: String (free text) **Description:** A concise, human-readable summary of key information about the funding opportunity that cannot be captured in the structured columns. Includes eligibility nuances, primary language of the grants page, thematic focus, access barriers, known grant amounts, institutional context, and data quality warnings.

Conventions:

- Entries are semicolon-separated phrases, not full sentences
- No trailing punctuation
- Keep to ≤ 150 characters where possible (longer entries acceptable for complex cases)
- Include the phrase strong fit when the opportunity is particularly well-aligned with GrantGlobe's target user (independent researcher, unaffiliated, Global South or underrepresented geography)
- Include language notes when the primary grants page is not in English (e.g., French-primary, Arabic-primary, Portuguese-primary)
- Include under-indexed when the opportunity is a key example of what GrantGlobe exists to surface
- Include approximate grant amounts when known (e.g., up to \$50,000, \$1,000–\$200,000)
- Include check for individual windows when individual_eligible is unknown and manual verification is needed
- Include active cycles when there is positive evidence of regular recurring grant rounds

Common phrase vocabulary used in notes:

Phrase	Meaning
strong fit	High relevance to GrantGlobe's target user
individual-eligible	Redundant confirmation of individual_eligible = yes (used in notes for emphasis)
under-indexed	Invisible to standard search engines; core GrantGlobe value-add
deeply under-indexed	Particularly invisible; very high GrantGlobe value-add
active cycles	Regular/recurring open calls confirmed
rolling	Accepting applications continuously without fixed deadline
check for individual windows	Individual eligibility unconfirmed; needs manual or LLM review
primarily institutional	Mostly funds organizations, not individuals
primarily [country]-based	Primarily for researchers based in a specific country
French-primary / Arabic-primary / Portuguese-primary	Grants page is primarily in a non-English language
English-language calls sometimes	Occasional English-language calls exist
limited English portal	Website exists in English but grant portal is not well-developed
nomination-only	Cannot apply directly; must be nominated
fiscal sponsor accepted	Fiscal sponsorship accepted in lieu of registered nonprofit status
[grant amount range]	Known or approximate grant amount
war-affected / conflict context	Institution operates in or serves conflict-affected region
status unclear	Institution's operational status is uncertain (e.g., post-coup, restructuring)
separate from [sibling org]	Clarifies relationship to a similar or parent institution already in the list

confidence

Type: String (controlled vocabulary — three values)

Description: The compiler's confidence that (a) the organization actively makes grants or offers funded opportunities, and (b) the domain and grants_url in this entry point to an active, English-accessible page. This is an assessment of data quality, not of the funding opportunity's competitiveness or value.

Valid values:

Value	Meaning
-------	---------

Value	Meaning
high	High confidence. The organization is well-documented, actively grant-making, and the URL is likely current. Institutional existence and grant activity confirmed through multiple signals.
medium	Moderate confidence. The organization is known to exist and grant-make, but the specific URL may be outdated, the English portal may be limited, or the grant cycle regularity is uncertain.
low	Low confidence. The organization may exist and have grant programs, but the English-language portal is weak or absent, the organization may be dormant, or the URL is a best guess. Requires more verification before crawler deployment.

Guidance for assigning confidence:

- high: Major multilateral bodies, well-known foundations, national research councils of larger countries, AI safety organizations with documented grant programs
- medium: Smaller national research councils, regional bodies with variable web presence, organizations known to exist but with limited documentation
- low: Institutions in conflict-affected regions with uncertain operational status, organizations with no confirmed English-language grant portal, best-guess entries from secondary sources

Note: confidence $\neq$ gap_flag. A low confidence entry is not necessarily a gap — it may be a confirmed institution with a weak web presence. A gap_flag = gap entry may have medium confidence (we know the type of institution exists in a region but haven't confirmed the specific entry).

gap_flag

Type: String (controlled vocabulary — two values)

Description: Flags entries where the coverage of a region, country, or institution type is known to be incomplete, and where Jason's domain knowledge or additional research is most needed to fill the gap.

Valid values:

Value	Meaning
no	No gap flag. Entry is representative and reasonable for this region/category.
gap	Gap flagged. This entry is in a region or category where coverage is thin. The entry may be a placeholder or best-guess that needs supplementation, or it may represent the only entry for a subregion where more institutions likely exist.

Current gap count (v0.5): 83 entries flagged as gap

Primary gap areas (from GAP_FLAGS.md):

- Francophone West Africa national research councils
- Central Asia (Kyrgyzstan, Tajikistan, Turkmenistan)
- Pacific Island national institutions
- Caribbean national bodies

- Arab world subregional bodies
 - Southeast Asia smaller countries (Cambodia, Laos)
 - Southern Africa national councils (Zimbabwe, Botswana, Malawi — partially filled in v0.5)
 - South Asia smaller countries (Bhutan, Maldives)
-

Data Entry Guidelines for Future Passes

1. **New entries** should follow the column order exactly: id, org_name, domain, grants_url, category, region, individual_eligible, notes, confidence, gap_flag
 2. **IDs** must be unique and sequential from the current maximum (550)
 3. **Do not modify existing IDs** — other systems may reference them
 4. **domains** must be root domain only, no protocol, no path
 5. **grants_urls** must be full HTTPS URLs
 6. **individual_eligible** should default to unknown if not confirmed; do not guess
 7. **confidence** should default to medium if not determined; use high only when grant activity is well-documented
 8. **gap_flag** should be set to gap for any entry where you know more institutions of the same type exist in the same region but haven't been listed yet
 9. **notes** should include under-indexed for any entry where you judge the institution would not appear in a standard Google search for grants
-

Pending: Jessica's Technical Review

The following sections are flagged for Jessica (DeepSeek-4-pro) to review and supplement:

1. **Category taxonomy rationalization** — The current category list has grown organically across four passes. Jessica should review for inconsistencies, suggest consolidation where categories overlap, and propose a flatter or more structured taxonomy if appropriate for the LLM extraction pipeline.
2. **Region controlled vocabulary** — Some region values are very specific (e.g., Global - JICA Partners) while others are broad (Global). Jessica should assess whether this level of granularity is useful for filtering in the search interface, or whether a separate funder_geography column would be cleaner.
3. **Notes field standardization** — The notes field is semi-structured free text. Jessica should assess whether any of the semi-structured phrases (e.g., strong fit, under-indexed, active cycles) should be extracted into their own boolean columns for easier programmatic filtering.
4. **LLM extraction prompt implications** — Jessica should review the column definitions and suggest any adjustments to field definitions that would make them easier for an LLM extraction pipeline to populate consistently from unstructured web content.
